BIOGRAPHY

LICIOUS turns changing seasons into songs

Contemporary pop. Real stories.

LICIOUS is a Chilean independent pop solo project launched in 2026. Its songs grow out of personal experiences and live among symbols, contradictions and those things we often understand better only after they have happened.

The project brings music, narrative and imagery together within a visual universe of its own. Each song may shift in atmosphere, rhythm or color, while keeping the same thread: saying what needs to be said without forcing an explanation, a trend or a formula.

ARTISTIC VISION

Music, storytelling and visual identity.

LICIOUS approaches every release as part of a larger story. The song is at the center; imagery, video and symbols expand what the song already contains.

The creative priority is simple: first, what the song needs to say or make you feel; then, the best artistic and musical way to express it. Presentation comes last, never the other way around.

**“Not everything needs to be explained.
Sometimes changing seasons
is enough.”**

A song about the moment when letting go of other people's expectations becomes a way of recognizing yourself. Direct, pop and bright, it works as an entry point into LICIOUS' identity without exhausting the rest of its universe.
